To Whom it may Concern,

Mountainland Technical College has given me the opportunity to find a company that is willing to take in a web development student to have first-hand experience in the technology industry starting May of 2023.

As a highly motivated and dedicated software engineer and developer, I believe I would make a good fit for the position and would be a wonderful addition to your team. I am certain that you will find me to be a valuable asset, for my experience aligns with the qualifications you are seeking for

With more than four years of technical experience and educational experience in web development and software engineering. I am adept in programming, debugging, and problem solving. Moreover, while my education and professional experience in programming has provided me with a well-rounded skill set, I excel in working on a team of developers looking to fix a problem.

Please view my attached resume for additional details regarding my expertise and career achievements.

Thank you for your time and consideration.

Sincerely, Brooke Strickland
